Perception Wikipedia

February 7th, 2019 - Perception from the Latin perceptio is the organization identification and interpretation of sensory information in order to represent and understand the presented information or the environment All perception involves signals that go through the nervous system which in turn result from physical or chemical stimulation of the sensory system For example vision involves light striking

The Psychology of Self Affirmation Sustaining the

February 7th, 2019 - Self affirmation processes are being activated by information that threatens the perceived adequacy or integrity of the self and as running their course until this perception is restored through explanation rationalization and or action

Illusory superiority Wikipedia

February 8th, 2019 - Psychology has traditionally assumed that generally accurate self perceptions are essential to good mental health This was challenged by a 1988 paper by Taylor and Brown who argued that mentally healthy individuals typically manifest three cognitive illusionsâ€”illusory superiority illusion of control and optimism bias This idea rapidly became very influential with some authorities
